SUMMARY

Computer Engineering student (expected 2028) with hands-on experience across Computer Vision, full-stack web development, and Generative AI / LangChain-based agent systems. Built a real-time hand gesture-controlled game using OpenCV & MediaPipe, an AI-powered Stock Market Analyzer combining LSTM deep learning with a LangChain AI agent, and multiple Django/FastAPI applications. Seeking an internship in Machine Learning, Generative AI, or Backend Development.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C, Java
AI / GenAI: LangChain, LangGraph, AI Agents, RAG, Groq/Llama, Tensorflow.keras (LSTM), Prompt Engineering
Web Development: Django, FastAPI, Streamlit, HTML, CSS, Bootstrap, Jinja2 Templates
Databases: PostgreSQL, MongoDB, ChromaDB (Vector Store)
ML & Computer Vision: OpenCV, MediaPipe, TensorFlow (basics), Scikit-learn (basics)
Data Analysis: Pandas, Matplotlib, Seaborn, Data Cleaning, Feature Engineering
Tools & Platforms: Git, GitHub, VS Code, REST APIs

EDUCATION

Bachelor of Engineering in Computer Engineering — Shree Swami Atmanand Saraswati Institute of Technology, Surat, Gujarat
2024 – 2028 (4th Semester Student) | CPI: 8.06/10 | Semester 3 SPI: 8.90/10
Higher Secondary Certificate (HSC) — Mauni International School, Surat, Gujarat
2022 – 2024

CERTIFICATIONS

Claude with the Anthropic API — Certificate of Completion
Anthropic Academy, July 2026 — Covered tool use, RAG, prompt caching, and extended thinking, with an introductory look at the Model Context Protocol (MCP)
Credential URL - <https://verify.skilljar.com/c/xrwmoofsrfgu8>

PROJECTS

- 1. AI Stock Market Analyzer (LSTM + LangChain AI Agent)**
Built a full-stack AI financial assistant that analyzes live stocks, predicts future prices using a custom-trained LSTM model, and surfaces real-time market news through an interactive Streamlit dashboard.
Tech Stack: Python, LangChain, LangGraph, Groq (Llama 3), Tensorflow.keras (LSTM), yFinance API, NewsAPI, Streamlit, Scikit-learn
Knowledge Gained: 75% in building AI Agents with tool-calling, sequence modeling with LSTM neural networks, and deploying ML models inside production-style web apps
Learning Impact: Can design and deploy end-to-end GenAI applications that combine deep learning predictions with agentic LLM workflows and live external data sources
- 2. Hand Gesture Supervised Game using Computer Vision**
Built a real-time hand gesture-controlled game using computer vision; webcam detects hand landmarks and maps gestures to in-game actions.
Tech Stack: Python, OpenCV, MediaPipe
Knowledge Gained: 70% in Computer Vision (hand tracking, gesture recognition)
Learning Impact: Can build real-time webcam-based interactive applications
- 3. Doctor Appointment Booking System**
Built a full-stack appointment booking platform where patients can register/login and book appointments with doctors; booked doctors are displayed dynamically on the patient's dashboard.
Tech Stack: Python, Django (models, views, templates), PostgreSQL, HTML/CSS
Knowledge Gained: 70% in Django authentication & authorization, database integration, and building responsive dynamic UIs
Learning Impact: Can build secure, real-world booking/management systems with proper user authentication and relational database design
- 4. Twitter (Clone)**
Built a social media web application with user authentication, post creation (text + images), and real-time search functionality.
Tech Stack: Django, PostgreSQL, Bootstrap, Jinja2 Templates
Knowledge Gained: 65% in Django advanced features (search, image uploads, content filtering)
Learning Impact: Can implement social media style features in web apps
- 5. Student Attendance Management System**
Web app where students mark attendance once per day (no duplicates), with login validation and a real-time dashboard for record management.
Tech Stack: FastAPI, MongoDB, Jinja2, HTML/CSS
Knowledge Gained: 70% in FastAPI & MongoDB (API development, NoSQL, business logic)
Learning Impact: Can build modern API-first applications with NoSQL databases

ACTIVITIES

Smart India Hackathon (SIH) Participant — Participated in 2 SIH editions, solving real-world problem statements
SSIP Hackathon Participant — Contributed innovative project solutions in 1 SSIP hackathon
Self Learner — Built 4+ production-ready projects using YouTube, documentation, and open-source resources
